

GOLDEN HORSESHOE AREA LAND USE PLANNING

Client: Urban Development Institute

Over the past five years, **Malone Given Parsons Ltd.** has been compiling information on the land-use planning and infrastructure environment of Southern Ontario. The result of this endeavour is the South Central Ontario Planned Urban Structure Map. This map is based on land-use designations found in Official Plans, Secondary Plans, Community Plans and Amendments thereto from Municipalities, Counties and Regions across South Central Ontario. The designations used in each of the aforementioned data sources have been thoroughly examined and interpreted to derive generalized, homogenous designations.

These composite designations (Urban Areas, Employment Areas, Major Open Space, Agricultural Areas and Rural Areas) enable efficient comparison of land-use across planning jurisdictions, and allow for a more holistic view of the planned urban structure of South Central Ontario. This map is being constantly monitored and updated with current information, to make it the most up-to-date source of composite land-use planning information in southern Ontario.
