

## **GOLDEN HORSESHOE AREA LAND SUPPLY ANALYSIS**

*Client: Urban Development Institute*

**Malone Given Parsons Ltd.** conducted an extensive analysis on the availability of vacant land in the Golden Horseshoe Area as a counterpoint to the Province of Ontario's preparatory work for the Places to Grow Plan. Detailed information was created relating to Greenbelt Plan, Ministry of Natural Resources environmental constraint areas, and current employment generators. Land-use designations found in Official Plans, Secondary Plans, Community Plans and Amendments were used to define Built-Up, Designated Greenfield Employment and Urban, and Agricultural and Rural Lands. This work was crafted into a series of maps, reports, and presentations that were delivered by UDI to regional and local municipalities throughout the GTA.
