

APPLICATIONS OF HIGH RESOLUTION SATELLITE IMAGERY

Malone Given Parsons Ltd. provides technical solutions for using high-resolution satellite imagery for municipal applications. With the one metre resolution CARTERRA brand imagery collected by IKONOS of Space Imaging, municipalities will be able to pursue multiple applications that have not necessarily been possible in the past.

The new CARTERRA imagery will be detailed, up-to-date, timely, digital, accurate, and information rich. It will open the door for applications ranging from mapping, road and highway planning, telecommunication cell siting, corridor planning, precision farming, natural resource management, forestry monitoring and real estate evaluation.
