

## SCHOOL CAPACITY PROJECTION

*Client: Oxford County Board of Education*

**Malone Given Parsons Ltd.** assisted the Oxford County Board of Education in analyzing future demand for student space in the City of Woodstock and surrounding area. With the Southside Community of the City of Woodstock on the verge of being developed for residential uses, and existing schools near or over capacity, our analysis assisted the Board in assessing its short and long term facilities needs using Assessment Office and County of Oxford databases.

Malone Given Parsons Ltd. applied spatial analysis to accurately determine school districts most likely in need of increased facility space based on population projections, present and future growth rates, as well as future development potential for the area.
